

Solution Briefing: Brisken Market Data Hub

Implement Central Market Data Governance across your system landscape

In a complex and dynamic environment, companies face different challenges with different strategies to achieve different goals. You might be a multi-billion-dollar organization, a global asset manager or start-up company. Nevertheless, we believe that in order to achieve and maintain success you need to source fast and easy services that enable you to add value for your customers. When you are looking to use external market data, but you are worried about inconsistencies, long lead times for implementations, spiralling cost, auditability, additional head count - don't worry no more!

Simply choose the **Brisken Market Data Hub - your plug & play, zero code, market data governance solution with out of the box connectivity to prime data providers** including but not limited to Bloomberg®, Thomson Reuters®, Quandl®, OANDA®, Central Banks, Regulatory Agencies, Credit Agencies, Exchanges, or any other internal or external source.

Dependency on multiple non standardized data sources

Data inconsistencies or technical failures expose you to risks of misreporting and can trigger restatements of financial results. This in turn can cause financial and reputational losses for the company, making it more difficult to attract new customers and develop.

Consolidate & streamline into data "powerhouse"!

By leveraging data, the Brisken Market Data Hub provides you with the tools and built-in expertise to eliminate data redundancies, identify and address anomalies and automate the flow of financial information.

Data Analytics

Build insights by exploring your data using the pre-built Market Data Hub views. Capture, Analyze and act on Data in motion. Empower your Digital Boardroom with curated external data.

Add value with the *brisken* Market Data Hub

Mitigate risks through leveraging data audit and continuously scanning for anomalies.

Build automation fast and easy by configuring your data flows to feed your system landscape with the recurrence of your choice.

Apply highest standards for data quality, focus on what is important for you: **taking decisive action to meet your goals.**

Central repository of market data allows for an instantly available documentation for auditors and **builds trust** inside your organization.

Reduce costs (by avoiding cross-system reconciliations & improving financial and commercial reporting).

Plug & Play Connectivity

Connect to any data provider such as Refinitiv®, OANDA®, Bloomberg®, Central Banks, Regulatory Agencies, Exchanges, Credit Agencies, etc. And distribute the data to any system or app, SAP or non-SAP, on-premise or in the cloud.

Single Source of truth

A central market data repository with comprehensive data governance acting as the single source of truth for everything related to market data across the entire system landscape.

Full Automation

Fully configurable data flows allow you to automate your integration process by setting up schedules, mapping, data validation and data cleansing, anomaly detection with exception workflows.
