
T+ Framework

Control

Release Date: 12/22/20212

Enhancements & New Features

Ref #	Description
227	Increase number of max allowed records to download Increase the number of lines that can be downloaded from the app data viewer from 1,000 lines to 10,000 lines.

Bug Fixes

Ref #	Description
232	Change flow execution app security role from flow to flow execution When a user needs to run a flow on demand, he needs the <u>flow</u> role but this role also enables the user to design new flows. Now the required role was changed to <u>flowexecution</u> .
